

What you are considering is not only misplaced; it violates basic states' rights principles and my right to keep unwanted and unsolicited calls off of my PRIVATE phone and out of my PRIVATE space. Wisconsin has a well developed and understood "no call system". Leave it alone! I like it and it works well. If other states want to use your system or ideas, let them. We have one that works. I will fight all attempts to undermine Wisconsin's system.  
Sincerely, Roger Springman
